Nearly 12 million of these acres do not have a well in use but could still be developed for energy. Between the following two statements which one is closest to you view on this issue: [ROTATE]

We should stop issuing new leases until the lands currently leased are being used for the development of oil and gas. We need to restore balance to the process by requiring companies to use their leased and unused land before leasing new land.

Republicans and Democrats have protected and ensured access to treasured lands, mountains and deserts since the days of Teddy Roosevelt. We can't let our current dysfunctional politics stop what America does best, creating parks and monuments, ensuring public lands stay public	6.9	6.7	7.0	7.0	7.1	6.7	6.9

29-6) We must address the threat of climate change on day one of a new administration, we should stop new oil and gas drilling on public land. We have to put the public interest over corporate profits	6.0	5.9	6.0	5.6	6.1	6.1	5.9
29-7) We need to pursue energy dominance for America by opening up our vast national resources, including those in the West. We can produce more, export more, and grow our economy and create jobs with oil, gas, and mining expansion	4.6	4.9	4.3	4.6	4.5	4.9	4.7
29-8) Energy and mining companies are leasing public lands for pennies on the dollar to explore for energy and minerals. The U.S. should charge them the fair market value for these leases to give taxpayers a fair return on their investment and help reduce the national debt	6.9	7.0	6.8	7.0	6.9	6.8	6.8
29-9) Too much of the West is federally owned and controlled in an unaccountable way, leaving taxpayers without local control or access to use our natural resources to grow our economy. CANDIDATE DESCRIPTIONS

[ROTATE Q30 & Q31]

30. Now I am going to read you a couple of descriptions of potential political candidates. Between the following two candidates, which one are you most likely to vote for? ROTATE

A candidate who believes that the outdoors are what define the west; who will make protecting our land, water, and wildlife a top priority to support our quality of life and our recreation economy; and who believes that we can have energy development on public lands if we manage it in a balanced way, with safeguards on oil and gas development and a preference toward approving clean wind and solar power

//OR//

A candidate who says that federal bureaucrats overreach in their management of western public lands. This candidate will, if elected, prioritize local control on national public lands; is someone who believes that we need to deregulate the energy and mining industries to ensure that we are giving oil and gas companies the access they need to produce enough domestic energy to make America energy independent as soon as possible while creating good paying jobs in the west.

31. And between these two candidates, which one are you most likely to vote for? ROTATE

A candidate who will make protecting our land, water, and air a top priority, and who believes that we need to keep oil, gas, and coal in the ground to protect our air and the climate for future generations. And says that together we can create a cleaner future by creating clean energy jobs and replacing fracking and coal with wind and solar

//OR//

A candidate who wants to make domestic energy and jobs a high priority but also understands that we have to protect outdoor spaces that make the west special. This candidate will make it a high priority to give access to public lands to hunters and fishermen, help ranchers and farmers, and stand up for the western way of life.
