A few facts about oil & gas development on public lands

**LEASING**

25 million acres of U.S. public lands managed by the Bureau of Land Management, an area the size of Indiana, are leased for oil and gas development.¹

90% of U.S. public lands managed by the BLM are available for oil and gas leasing.²

10% of U.S. public lands managed by the BLM are protected for recreation, conservation, and wildlife.²

Wilderness-quality lands are nearly 3 times less likely to be managed to protect those characteristics if they are overlapped by oil and gas leases.³

**BONDING**
